Project Design Phase-I
Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID33638
Project Name	Real-Time Communication System Powered by AI For Specially Abled
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- A convenient feature of many smartwatches is their heart rate monitor, movement sensing and voice monitoring or guiding. You may want to check your heart rate regularly for a variety of reasons, from improving your athletic performance to managing your stress levels to tracking your heart health.
- The latest fitbit Sense smart watch has a strong focus on stress-busting and it detect even the single movement of Disability person by using movement sensor.
